PROFESSIONAL SUMMARY

Senior Software Engineer with **2.5+ years** experience building scalable **React** apps, **reusable** components, and optimized state management, alongside backend API integration using **Spring Boot**.

EXPERIENCE

Veersa Technologies

Senior Software Engineer

Feb 2023 – Present

Noida, Uttar Pradesh

- **Enhanced Performance** - Modernized a legacy .NET WinForm application (**HealthEdge**) into a scalable React-based web platform, boosting performance by 25% and enhancing overall user experience.
- **UI Modernization and BR's Extraction** - Engineered **120+ reusable** React components with modular design principles, enabling a 30% faster development cycle for new features.
- **State Management Optimization** - Implemented **Redux** for centralized state management and **Saga** for handling asynchronous actions, attaining a 20% reduction in page load times.
- **API Modernization** - Designed and implemented a **microservice adapter** that transformed **200+** SOAP APIs into RESTful services, enabling modern, efficient frontend-backend integration.
- **Real-Time Monitoring** - Built **16 real-time** Kibana dashboards (**67 panels**) integrated with elasticsearch for system monitoring and user analytics.
- **WebSocket Integration** - Integrated **WebSocket** across 3 key modules to enable real-time screen duration tracking and support **mock API simulation**.
- **Dashboard Automation** - Automated Kibana dashboard migration with a **Java-based CLI tool**, reducing a **2-week manual task to just 5 minutes** with 95%+ accuracy and ensuring repeatable deployments.
- **Release Readiness Boost** - Enhanced CI/CD readiness by increasing downstream integration test (IT) pass rate in the Classic module from **30% to 99%**, ensuring stability before production releases.
- **Scalable Deployments** - Engineered a **multi-VM, multi-server Tomcat** deployment setup, enabling property-driven deployments to environment-specific remote servers for better scalability.

EDUCATION

Deenbandhu Chhotu Ram University of Science and Technology

Bachelor of Technology in Electronics and Communication Engineering; CGPA: 8.8

2019 - 2023

Murthal, Haryana

TECHNICAL SKILLS

Programming: Core Java, JavaScript, TypeScript, Object-Oriented Programming, Data Structures

Development: ReactJS, Redux, Saga, Zustand, REST APIs, WebSocket

Databases & Tools: Elasticsearch, Kibana, SQL

Miscellaneous: Postman, BitBucket, JIRA, Git/GitHub, CI/CD(Jenkins)

Handles: Code360 - [abhujea](#) Leetcode - [abhujea](#) HackerRank - [ankit2000](#)

PROJECTS

Technova | *ReactJS, JavaScript, Zustand, Firebase, GoDaddy, Git/GitHub*

- **Led** frontend development for a responsive technical fest website accessed by **1300+** users, ensuring responsive design and smooth navigation.
- Integrated **Firebase authentication** (email verification, password reset), reducing user support queries by 50%.
- Deployed the application on **Firebase Hosting** and mapped it to a **GoDaddy** domain, offering smooth and **reliable user access** during the event.
- Designed component structure using Zustand for **state management**, improving load speed by 20%.

ACHIEVEMENTS

- **Rising Star of Q4 2023 and Achiever of the Month (Jan 2025)** - Veersa Technologies
